### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This Office action is responsive to communication received 04/09/2004 – application papers filed; 01/14/2005 – Power of Attorney.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a method for enabling a golfer to address a stationary golf ball, classified in class 473, subclass 409.
- II. Claims 4-21, drawn to a golf club, classified in class 473, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product. For example, if the shaft is connected midway between the heel and toe of the club head and is attached in such a way that the shaft and handle are oriented at 90 degrees with respect to the top plane of the club head so that the club resembles the more familiar pendulum style of putters, the first and second alignment marks may be lined-up so that both marks are directly behind a golf ball at address and located in a line that is substantially perpendicular to the plane of the striking face. Thus, a golfer may have an enhanced indication of the direction of travel of the golf ball towards the target. In essence, the golfer would see

Art Unit: 3711

substantially one line as he or she looks down at the golf ball and club head at address. By way of another example, either of the lines could be used for squaring up to a target during a putt. In other words, a golfer may decide to place the club head and shaft on the ground on a putting green and line up either of the first or second alignment marks with the intended target in order to be able to better align himself or herself with the target and with the ball and club face.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sebastiano Passaniti whose telephone number is 571-272-4413. The examiner can normally be reached on Monday through Friday (6:30AM - 3:00PM).
